

EN 397

The protective helmet is made of polycarbonate which ensures its resistance to damage and very low weight. The helmet is comfortable to use and adjusts to the head shape and size – it is fitted with a six-point webbing harness and includes a sweat band. Features closable ventilation holes. Slots for mounting hearing protection are provided on both sides. On the inner side, the helmet is fitted with standard transparent polycarbonate goggles. Tinted goggles are also available. This helmet is recommended for scaffolding fitters, tree climbers, crane operators; does not limit user's visibility and ensures comfort when looking up. Thanks to a four-point chin strap, the helmet is particularly comfortable to use when performing overhead work.

PARAMETERS

Weight	490 g	HEADBAND	
SHELL		Adjustment	knob
