

# DX 020

## Multi-functional rescue stretcher

DX 020 is a multi-functional rescue stretcher. The DX 020 can be dragged on virtually any surface, and attached under a helicopter, lifted or carried. Can also be used as an alternative means of transport for heavy equipment. Perfect for use as a water rescue system. The device's functionality makes it one of the most versatile transport systems. Thanks to its special design it is possible to adjust the width and length depending on a patient's size.

The set comprises the following elements:

1. stretcher with a flexible structure,
2. slings enabling transport in a horizontal position,
3. rope enabling the patient's transportation in a vertical position,
4. carrying back pack with an attachment point for dragging a patient on the stretcher,
5. additional 4 holders if more rescuers are available for transporting a patient,
6. AZ 018 connector.

### PARAMETERS

Weight	6.26 kg
Dimensions unfolded	2435 x 920 mm
Transport dimensions	180 x 920 mm
Operating temperature range of the stretcher [°C]	-30/+50

Max. load	500 kg
