DWR040S is a lightweight fall arrest device with two webbings, designed for work requiring frequent changes of the attachment point. The locking mechanism is located in a durable housing with a swivel in the upper part of the device. No need for an additional safety shock absorber. The device has built-in snap connectors AZ 001ASI or AZ 029SI with a swivel and an indicator.

The DWR040S self-locking device is a component of individual fall protection equipment.

The device must be connected to the back point of the safety harness!
